

## GRIP STRIP

### FEATURES & APPLICATIONS

Grip strip is a specifically designed rubber extrusion used to fasten Dust Sealing Cloth over a 10mm round bar mounted on conveying and screening equipment.

This fastening method allows for the easy replacement of worn or damaged Dust Sealing Cloth.

Grip Strip is manufactured from a high grade EPDM rubber compound specifically designed to have excellent resilience and ozone resistance.

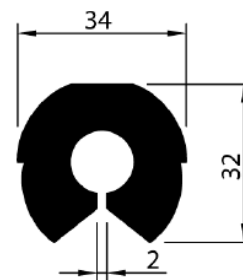

### TECHNICAL PROPERTIES

Polymer	<b>EPDM</b>	
Colour	<b>Black</b>	
Specific Gravity	<b>1.20 g/cm<sup>3</sup></b>	ASTM D297
Hardness	<b>76° ± 5° Shore A</b>	ASTM D2240
Tensile Strength	<b>10 MPa (min)</b>	ASTM D412
Elongation @ break	<b>400 % (min)</b>	ASTM D412
Temperature Range	<b>-30°C to +100°C</b>	

### AVAILABLE SIZES

- Grip strip standard roll length: 20 mtrs
- Custom length rolls can be supplied upon request
- Grip strip elbows can be supplied with 3 groove types

Inside Groove

Outside Groove

Underside Groove
