

## Moulded Cone Crusher Wear Liners

Rubber distribution plates and feed hopper liners have proved to be an extremely practical and economical substitute for the conventional steel liners used in most cone crushers.

Our distribution feed plates and feed hoppers are custom designed for each application using only the highest quality wear resistant rubber.

With today's strict OH&S regulations noise pollution around the workplace is now a major consideration. Our rubber liners have been successful in reducing noise levels in crusher areas by up to 50%.

### Feed Distribution Plate

- ✓ Moulded with abrasion and impact resistant rubber
- ✓ Custom designed for each application
- ✓ Fixed in position utilising existing bolt holes
- ✓ Thicknesses vary from between 50 and 125mm
- ✓ Can be manufactured for most makes and styles of crushers.

### Feed Hopper Liners

- ✓ Superior wear life to conventional steel liners by 3-1
- ✓ Significant noise reduction up to 50%
- ✓ Optional extended hopper with inspection or access door
- ✓ Guaranteed cost effective
- ✓ Available for Symons, Jaques and Nordberg
